Interior Design Solutions

The soul of your property is good design. Values, harmony, uniqueness, and comfort are the goals that most owners wish to realize by interior design.

However, this goal is only achievable with the help of year-long professional experience. InfraWorld's advisors boast this experience.

Lighting technology has also developed a lot over the last decades; therefore, the role of lighting has also been increasing, especially there where luxurious atmospheres need to be created. Nowadays, the style of interiors can not only be defined by the design of lamp shades or chandeliers but also by the great variety of indirect luminaires such as spot and moodlights. The Himalayan salt wall should not only be regarded as a piece of decoration or the best space divider of the century but also as a modern solution for you and your family to preserve your health.

Himalayan salt caves and salt rooms

Electronic devices, smog and air pollution are all responsible for the imbalance of positively and negatively charged particles. The quality of air you breathe in determines your health. If this air contains too many positively charged ions, you can feel discomfort, physical or mental weakness, furthermore, it can also lead to insomnia or the weakening of the immune system. Your health problems can be cured naturally with the help of salt caves made of Himalayan salt.

The atmosphere of Himalayan salt caves is a special, bacteriologically clean microclimate. The air in Himalayan salt caves is full of minerals and microorganisms beneficial for your health. Moreover, it has a constant temperature and is negatively charged; all of which have highly beneficial effects on your health

Himalayan salt crystals

It has been known for centuries that the climate of salt caves and salt mines has a curative effect on respiratory diseases, skin and joint problems. Salt therapy is a wonderful way of detoxification. Inhaled salt crystals stimulate the cleaning mechanism of the body since the widely known solvent effect of salt can help the self-cleaning of the respiratory circuit.

Your health problems can be cured naturally with the help of salt caves made of Himalayan salt. The atmosphere of Himalayan salt caves is a special, bacteriologically clean microclimate. The air in Himalayan salt caves is full of minerals and microorganisms beneficial for your health. Moreover, it has a constant temperature and is negatively charged; all of which have highly beneficial effects on your health. Beside these, it contains chemical elements such as iodine, potassium, magnesium or selenium, which are all important for your body.

The most important factor of the healing effects of Himalayan salt cabins is their impact on the respiratory mucosa and smooth bronchial muscles. It is due to these natural minerals that salt therapies are so effective and noble.

Technology

PHILIPS Vitae infralamps

The Hi-Tech Philips Vitae IR lamps' radiation is optimal within the total range of infrared wavelengths (Type A, B and C IR radiation), which is the most suitable for human skin. Thus, in addition to the desired depth of penetration, it ensures optimal temperature sensation and the unconcentrated warming of the body, making the treatment more comfortable and effective. Heat provided by Philips Vitae lamps is similar to the sun's natural radiation. With the help of radiation of the total IR wavelength range and the consistent warming of the subcutaneous tissues, you can achieve effective detoxification.

Intelligent Wall Control Consoles

- Sectional efficiency and temperature control, electronic timer.
- Set IR radiation intensity and temperature on a percentage based scale.
- Divide IR radiation and temperature into two sections. Within these sections, setting is available both manually and automatically, in order to avoid extreme infrared radiation and to ensure a consistent and safe treatment for the human body.
- The console is available for traditional Finnish, infrared and combined sauna cabins, as well.
- Choose from three languages, set time and date on the backlit LCD screen.
- Sound and light alarms call your attention to the fact that the treatment is over.
- Over 130 °Celsius, the intelligent wall control console stops the operation to keep you safe.

Massage bed with Spa Pro Jade stones

Spine problems are familiar for everyone. The condition of the spine defines the condition of the nerves connecting the spinal-cord and the internal organs. Therefore, it has an effect on your whole body. Diseases of the spine can only be prevented by doing sport regularly as a child or teenager. For adults the only curing methods are physiotherapy, special spine therapy and massage. The Spa Pro Jade massage bed offers help for sufferers of these spine problems.

The Spa Pro Jade massage bed can effectively preserve your well-being and back up a wide range of therapies:

Benefits of treatments:

- Setting vertebra
- Freeing up the nerve fibers
- Alleviating joint and muscle pain
- Muscle relaxation
- Cleaning out and detoxifying your body
- Increase your life energy
- Helping the incorporation of calcium
- Improving blood circulation and blood vessel dilation
- Eliminating numbness
- Reducing blood sugar
- Feeling better

- Premium Model 2011
- 8 Programs
- special neck rolls
- integrated MP3-Player
- 3 years warranty
- ORKI (Hungarian Institute for Healthcare Quality Improvement and Hospital Engineering) authorization number: (8-057-380-0812)
